

#10250-CS

U.S. Patent #6.066.834 / Canadian Patent #2233837 / ©2003 Ready Welder Corporation

The most powerful, affordable, portable, versatile MIG Welder in the world!

The **Ready Welder Model # 10250-CS** is most frequently bought and used by welders and welding facilities wanting a MIG Spool Gun attachment to run off their Miller, Lincoln, Hobart, and Esab machines. This model is an excellent choice for welders that have engine drivers or those that weld aluminum in the shop connected to a MIG or Stick machine. The **Model # 10250-CS** is about 1/3 of the cost of most other manufacturer's pool guns in that there is no ground cable supplied, as most of these machines already have the ground built into them. The **Model # 10250-CS** can run off batteries by the user supplying the ground cable and the series cable for the batteries. This model also includes our SC to DC Power Converter to supply 24 DC voltage to the RWII circuitry...used only when connecting to CC (constant current) Stick welding machines.

The **Model # 10250-CS** has a one year 100% parts and labor factory warranty. The Cold Switch was manufactured for different types of customers (Navy, Army, Welding Shops, etc). With the Cold Switch the Ready Welder will no longer create an arc. It will only arc when the trigger is pulled. When you are finished welding you can lay the welder down with no problems of the welder creating an arc.

Ready Welder II

Model 10250-CS Features:

- Cabled as a spool gun attachment for all DC output welders
- Welds Steel, Stainless and Aluminum or Any Metals Where Standard One or Two Pound Spools are Available
- Connects to Batteries
 - 18 Volt Battery Can do Thin Sheet Metal
 - 24 Volt will Single Pass 1/2" @275 amp
 - 36 Volt will Weld up to 3/4" @350 to 400 amp
- Welds 22 Gage to 3/4"
- Ground Cable not supplied
- Connects to MIG/Constant Voltage, Stick/Constant Current Welding Machines
- AC to DC Power Converter to Drive Gun Controls When Connected to CC/Stick Machines
- Uses Wire Sizes from .023 to .045 Without Changing Rollers
- Uses Heavy-Duty Tweco Quality Front End Consumables

- Wire Speeds of 50 Inches to 900 Inches Per Minute
- Polarity Indicator Lights
- Twenty Foot Cable with Quick Disconnects, Can be Extended to 100 Feet
- Built-in Gas Valve

Ready Welder II

Case Includes:

- RWII High-Impact MIG Gun
- Twenty Feet of Cable
- One Spool of Flux Core Wire
- Extra Tips and Gas Hose Fitting
- Ten Extra Feet of Gas Hose
- Foam Lined Blow-Molded Tough Briefcase
- AC/DC Power Supply to Drive Gun Controls When Connected to a CC Power Source
